

Installing the Software Manuals Collection

This page appears every time you select the **Online Documentation** command until you install the Software Manuals collection as follows:

1. Copy the following files and directories from the root directory of the Xilinx ISE Disk 1 CD-ROM to your `$XILINX/doc/usenglish` directory:
 - ◆ `manuals.pdf`
 - ◆ `help.pdf`
 - ◆ `docs/`
 - ◆ `search/`
2. Open `manuals.pdf` to view the collection.

To ensure that you can view and search the PDF manuals, upgrade to Adobe® Acrobat® Reader™ +Search. See the `readme.txt` file on either Xilinx ISE CD-ROM for details.

Note To read manuals on the Web, go to <http://support.xilinx.com> and click the **Software Manuals** button in the left navigation bar. To read the manuals from the Xilinx ISE Disk 1 CD-ROM, open the `manuals.pdf` file.
